SOLARCOM COLLECTION
CASEMENT WINDOW

CASEMENT WINDOW

Designed for multi-residential, institutional, and commercial projects, the Solarcom casement window combines technical performance with architectural flexibility.

Fully made of aluminum, this window integrates a high-efficiency thermal barrier. It stands out for its durability, sleek design, and ease of maintenance. Redesigned to better adapt to on-site realities, it offers:

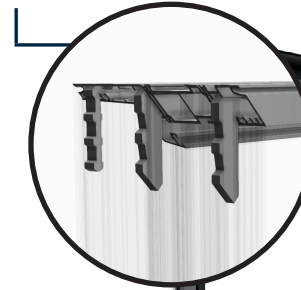

- Improved insulation
- Revisited and refined frame detail for more efficient integration
- Robust construction suitable for intensive use in institutional settings

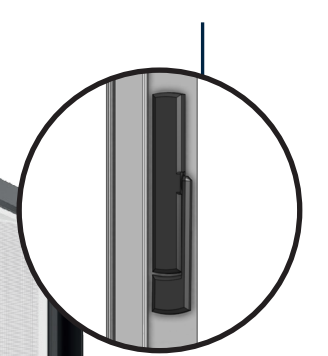

The Solarcom collection is ideal for public projects, offering inward or outward openings and a balance between ventilation, security, and thermal performance. It can also be customized to meet the specific needs of each project.

ADVANTAGES

Reinforced, watertight frame corners using triple-bracket crimping and sealed with compression gasket

Contemporary multipoint locking mechanism ensuring security and compression uniformity

Extruded aluminum insect screen frame providing superior rigidity and durability

Ergonomic contemporary handle operator

Durable powder-coat finish using an AAMA-2604 certified process, ideal for high-exposure applications and coastal environments
